

Minutes – Pre-interim Evaluation Meeting – Final Year Project

<Nutrition tracking mobile application >

<09/09/2023>

1. Opening

The meeting held through zoom meeting.

2. Attendee's list

Dr. Azmeer Mohamed

A.Sinthujan

K.Rajikshan

3. Discussion

First we show our work to the supervisor. We finish API calling in our application. Supervisor told us to change the whole project working cycle. He gives us valuable information about starting the project. Based on that we change our initial plans about the project. We discuss about

- **SRS document:** A software requirements specification (SRS) is a document that describes what the software will do and how it will be expected to perform
- **Navigation map:** this is about how we are navigating through the application
- **UI mockup, UI sample :** how the user interface of the application will work
- **Mood board:** an important digital design tool By emphasizing visual appeal, mood boards can help hone a jointly-owned creative vision for a digital product
- **Inspiration**

4. Conclusion

We need to change the approach of our app building. We finished SRS document and started working on UI now. Further discussion and conversation with supervisor we can complete this project.

Supervisors' Confirmation

I hereby confirm that the contents of these minutes are true and accurate, to the best of my knowledge.

Thank you,
